20. Conclusion

In conclusion, each College of the University is conceptualized and designed as a model academic community, complete in every sense. Similarly, every campus is conceptualized and designed as a model academic city, complete with academic, industrial, commercial, social, business and agricultural basic infrastructures; aimed at making the University 85% self-reliant and independent in essential goods and services; facilities and infrastructures, academic advancement, training, research and development.

In pursuance of efficient management of the University; the designed student's population, and programmes are our direct responses to national needs, modern trends and advancement in medicine and health sciences; engineering, science and technology; and their relevance to national quest for development, economic prosperity and global education competition.

We have through deliberate administrative scheme expanded major fields of study and disciplines to accommodate the envisaged high student's population in the University to avoid congestions in colleges, faculties, departments, laboratories, workshops, hostels and in all facilities of the institution.

This is in pursuance of the Objectives, Vision, Mission and Philosophy of the University; and to make living secure and safe, learning attractively interesting, and pleasurable on our campuses.

Finally, as our statement of commitment and mark of excellence by the University; we invite the Commission to give us an infant, and watch us turn him a Surgeon @ 25 in Clinton University of Nigeria [CUNN], Calabar, Cross River State, South-South, Nigeria.

In the same vein, we have provided adequately the prescribed requirements in terms of research votes, funding, staffing, land space, hostels and staff accommodation; Lecture halls and Class Rooms; Engineering and technology workshops; Laboratories, Offices, and Recreational facilities amongst others.

We have also adequately provided for staff and students health; recreation, social, spiritual, security, safety, transportation and communication facilities on our campuses. Certainly, we are satisfied and proud to be associated with this project; and have the honour and privilege to invite the Commission to assist our Board in its quest to berth the biggest tertiary institution on African continent, and third largest University globally on enrollment sitting in the Federal Republic of Nigeria.
